

CHEESE MENU

Authentic artisan cheese stands above the rest as every step of its creation, even the smallest, was taken with only one thing in mind, and that is You. The way the cheese should taste is what guides cheesemakers through every decision they make. They strive to convey most authentically what nature has put on this earth and extract the best possible flavor and texture for the cheese.

HOW TO TASTE CHEESE LIKE A PRO?

Make sure your cheese reaches a room temperature before serving it - only then will you be able to get the best of it (both texture- and flavour-wise). If wine is involved use it to wash your palate (water should do the trick too).

Take a look at your cheese - examine the rind, the colour and texture. What can you expect after you bite into it? Smell the cheese. Think of what aromas strike you. Are the aromas the same on the rind as they are on the paste?

Taste the cheese - pay attention to the texture, aromas and flavours - make sure it covers your palate.

If wine is present taste the cheese again - this time with a sip of wine. Enjoy!
